March 10th, 1920

Dr. J. G. Adami,
Vice-Chancellor, University of Liverpool,
Liverpool, England.

My dear Dr. Adami:

The lady to whom you referred in your letter has never appeared so that I have been unable to do anything for her.

I am glad to know that you are enjoying your work in Liverpool so much. May you find it increasingly interesting. A year ago I had the pleasure of seeing your boy at the Royal Military College in Kingston. He was head boy at that time and I heard nothing but good about him. I hope that he is doing well.

We have had a very busy winter. The pressure of students has been extreme and for next year it bids to be even worse with the result that our buildings will be overcrowded, but with prices of building as they are we wish to undertake as little construction as possible. The new six years' course is getting well under way and modified as it has been in the earlier years it is I am sure going to be very satisfactory.

Yesterday and to-day we have had an interesting visit from Dr. Vincent and Dr. Pearse of the Rockefeller Foundation who, as you know, are giving five million dollars to medical education in Canada. Their plans, however, will not be formulated for along time until they have made thorough investigation.

Sir Auckland Geddes has treated McGill very shabbily. It is a shame to keep a University back at such a time and use it as he has done.

With kind regards, I am,

Yours sincerely,

President.
